OF 8 (Rev 1-85)
U.S. Office of Personnel Management

INTRODUCTION

Position is located in the Directorate for Engineering and Technology Development (E), Program Executive Office (PEO), Assistant Secretary of the Army (Acquisition, Logistics and Technology). The mission of the PEO is to provide centralized management and direction for all research, development, acquisition and fielding of Army training devices, simulations and simulators, instrumentation, targets and threat simulation. The commander centrally directs, coordinates, and supports the materiel development, acquisition and sustainment activities through the matrix organization and four Project Managers. These divisions perform technology-based management, concept formulation, acquisition management and technical contract management of simulations, simulators, training systems and instrumentation projects assigned to the PEO. The incumbent participates as a student employee in a temporary employment/work experience program. The position receives primary guidance pertinent to day-to-day activities, work assignments, and training being provided by other higher graded professional and technical personnel as appropriate. Supervisor explains objectives of assignments and assigns work commensurate with the nature of training prescribed in program requirements. Supervisor provides instructions and assistance on the application of new concepts or resolution of difficult problems encountered, and reviews work upon completion for compliance to instructions, accuracy and adequacy of assembled information, and soundness of conclusions.

The purpose of this position is to provide engineering services in support of programs supported by the Directorate for Engineering and Technology Development.

This position is not an acquisition position in the Systems Planning, Research, Development and Engineering Career Field.

MAJOR DUTIES

Participates as a student employee in a temporary employment/work experience program. The on-the-job experience involves the practical application of the principles, concepts, work processes, regulations, and reference material fundamental to the Engineering profession. Receives a variety of assignments of moderate difficulty in any of the divisions of the Directorate.

1. Participates in recurring orientations designed to familiarize the employee with the current status of projects being accomplished by the organization and to provide an understanding of their interrelationship with and/or impact on work being accomplished in the division to which assigned at the time.

30%

2. Typical work assignments include drafting work on design drawings for reports; performing computations relative to the foregoing, and for estimates; assisting on field visits, taking measurements or making observations of instrumented conditions and recording same; writing technical reports or portions thereof; researching for and editing technical report material; assisting in the conduct of conferences and meetings; compiling data for management actions, including networks and input data for automatic data processing operations; and assisting in laboratory and field testing of materials.

70%

Performs other duties as assigned.

Factor 1 - Knowledge Required by the Position

Knowledge of engineering or computer science principles, theories, and practices as would be typically acquired while working towards a bachelor's degree in engineering or computer science with sufficient course work in electronics, computers and/or software, that would enable the employee to enter a training program and successfully complete planned training courses and assignments.

Factor 2 - Supervisory Controls

Works under general supervision of the Division chief. Receives explicit guidance from higher-grade engineers who assign work with oral or written instructions covering work methods and time limitations. Completes work in accordance with established procedures, plans and specifications, and other appropriate guidelines. Supervisor or a higher-grade engineer is available for additional assistance when deviations are noted. Non-routine work is spot-checked in progress, and upon completion is reviewed for adequacy, accuracy, timeliness, and adherence to instruction.

Factor 3 - Guidelines

Guidelines include detailed technical manuals, directives and criteria that are directly applicable. The incumbent works in strict adherence to the guidelines, consulting supervisor or higher-grade engineers for authorization of any deviations.

Factor 4 - Complexity

Assignments consist of specific, although often unrelated tasks, designed to orient the trainee in the practical application of textbook theory as well as the basic principles and methodology of the work. Tasks assigned are often the routine and detailed work involved in assignments of higher graded engineers.

Factor 5 - Scope and Effect

The purpose of the work is to provide the employee with practical application of academic theory and basic principles. Tasks are specific and limited, and are primarily for training purposes. Work supports the work of higher-grade engineers in the section.

Factor 6 - Personal Contacts

Contacts are primarily with higher-grade engineers within the section, and limited contacts with contractors.

Factor 7 - Purpose of Contacts

The purpose of the contacts is to gather and exchange information and to report on findings.

GS-0802-04 (TS/SCI), NL12729

Factor 8 - Physical Demands

Work within the office is sedentary, however, walking, stooping, bending, carrying equipment may be required.

Factor 9 - Work Environment

Work is usually performed in an office setting.
